

PHARMAJETTM

BLENDER & TANK DRYER

The PharmaJetTM is a portable system engineered to dry large blenders quickly, avoiding the long wait times associated with traditional air drying.

Driven by a powerful, state-of-the-art, high-efficiency blower, this rugged system uses forced air to dry blenders in 30 minutes or less with minimal operator attention. The system can also dry parts, tank exteriors, walls, and floors. The PharmaJetTM allows quick reuse of blenders and eliminates alcohol wipe downs, maximizing production time, blending capacity, and facility safety.

PharmaJet™ Features

SYSTEM HIGHLIGHTS

- Proven to dry blenders & tanks up to 2,300 gallons (150 cu. ft. working capacity) in 30 minutes or less
 - Dries 50-375 gallon blenders & tanks in 5-15 minutes
- Attachments available for rapid parts, tank exterior, wall, & floor dry-off
- Integrated safe design houses blower & electrical in separate cabinets
- Free standing on casters for mobility
- Sound attenuation (80-85dbA)
- High velocity, filtered air drying
 - Air Source: JetAir high-efficiency blower
- Power Requirements: 460VAC, 3 Phase, 20 HP [15kW]
- No confined space concerns
- Includes electrical cord & hose - plus storage for both components

CONTROLS

- Built to UL508, CSA, & CE standards
- Minimal operator attention required (start & let run)
- Variable Frequency Drive
- Simple touchscreen controls for:
 - On/Off
 - Speed
 - Timer
- LOTO line power fused disconnect

MAINTENANCE

- Washdown stainless steel 304 construction
- Sloped roof
- Outboard filter mounting for easy filter maintenance

Connection

Hose connects to blender via a manway cover
