

BLOWER ENCLOSURES & SPRAY SHIELDS

Pair JetAir's spray shield options with a blower enclosure for an easy-to-install, cost-effective drying solution.

Our stainless steel blower enclosures are designed to house and protect JetAir high-speed centrifugal blowers, variable frequency drives, and controls in an integrated safe design. When joined with our spray shields, which support air components and capture overspray, you get an ideal drying solution for low to moderate speed packaging lines. These arrangements use JetAir's high-speed centrifugal blowers to deliver clean, oil-free, filtered air for drying or blow-off prior to labeling, inspection, coding, sleeving, secondary packaging, and more. They easily integrate into existing packaging lines and all plant control networks.

Equipment Features

ENCLOSURE HIGHLIGHTS

- Integrated safe design houses blower and electrical in separate cabinets
- Full featured controls
- Free-standing with adjustable feet
- Sound attenuation
- Different sizes available to most compactly house blower

SPRAY SHIELD HIGHLIGHTS

- Self-supported application-specific air components
- Overspray collection
- Air noise reduction
- Lift-off side panels
- JetSet™ mounts for fast and repeatable changeovers
- Different sizes available to meet line requirements
 - 40-80"+ [1000-2000mm+]

CONTROLS

- Built to UL508, CSA, & CE standards
- Minimal operator attention required (start & let run)
- Variable Frequency Drive
- Simple touchscreen controls for:
 - On/Off
 - Speed
 - Timer
- LOTO line power fused disconnect

MAINTENANCE

- Washdown stainless steel 304 construction
- Maintenance indicators for service intervals
- Sloped roof
- Outboard filter mounting for easy filter maintenance
- Minimal spare parts

Sample Configurations

Blower enclosures and spray shields can be designed in any configurations to meet your conveyor size, available line space, etc.

DL1500 & ENC700

DL1000 & ENC500

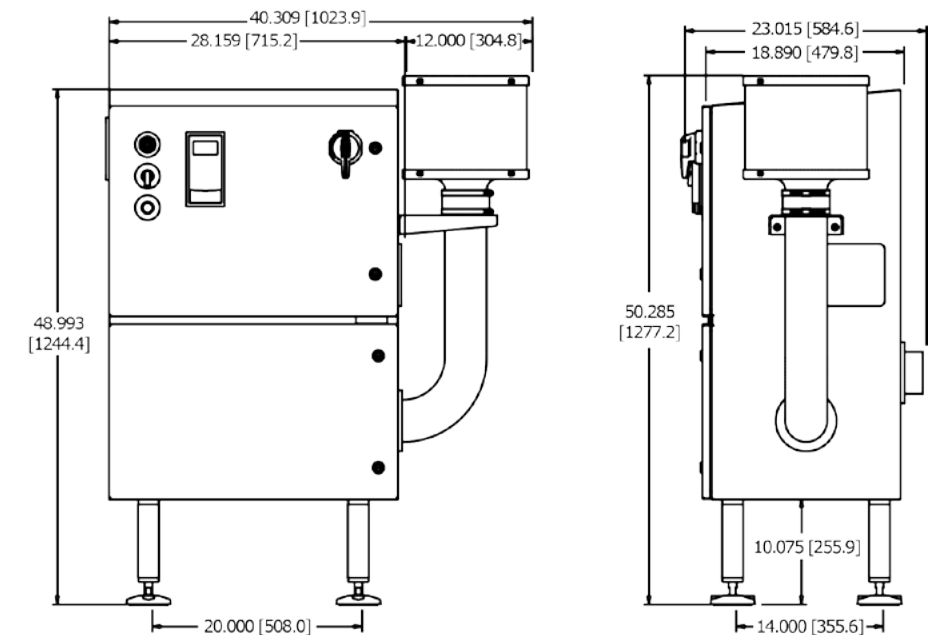

DL2000 & ENC800

Sample Dimensions: ENC700 & DL15000

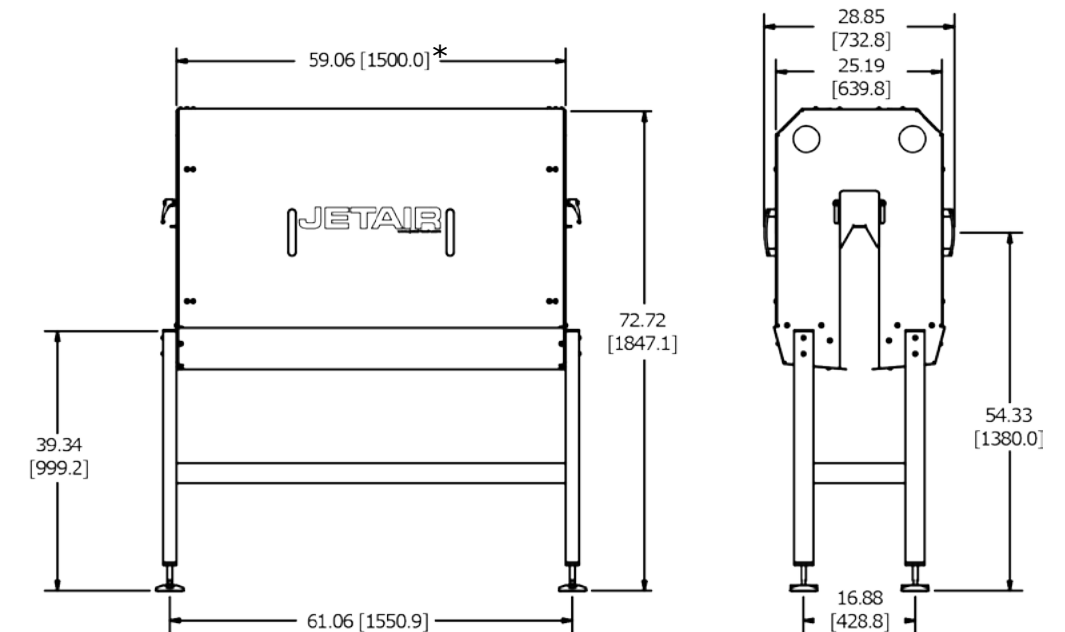

inches[mm]

ENC700 Blower Enclosure
